Ornithology

THE AUK

One of the foremost journals in ornithology and the official publication of the American Ornithologists' Union, *The Auk* publishes original reports on the biology of birds. For over 100 years, *The Auk* has spanned innovative empirical and theoretical findings – providing documentation, analysis, and interpretation of laboratory and field studies; theoretical or methodological developments; and reviews of new information and ideas.

“The Auk is unquestionably one of the world’s flagship scientific journals in ornithology, and I will look forward to its new partnership with a highly respected academic press.”

JOHN C. AVISE,
Distinguished Professor of Ecology and Evolution,
University of California, Irvine
